

SENATOR BEUTLER: Mr. Speaker, members of the Legislature, I certainly do not endorse everything that Senator Chambers has said. I think some of the things that he has said bear attention. I think that the language that he has suggested be added to the resolution is not harmful and in fact makes sense. I don't think that taken in and of itself that it is objectionable, at least it is not objectionable to me, and I plan to vote for the amendment. I think that we can vote for the amendment and not necessarily endorse everything that Senator Chambers has said, and that would be my attitude. Thank you.

PRESIDENT: Is there further discussion on the Chambers amendment? Any closing, Senator Chambers? Thank you. Oh, Senator Higgins.

SENATOR HIGGINS: Thank you, Mr. President. I would like to thank Senator Beutler for being here today to introduce this resolution. I'm sure many of us thought to do it, but Senator Beutler was up there, by golly and I commend him for writing this resolution and doing so, and for being here to talk on it this morning. I, too, will vote for Senator Chambers' amendment and for the resolution. Thank you.

PRESIDENT: Any closing, Senator? Thank you. Any further...all right. Motion is to adopt the amendment offered by Senator Chambers to resolution 580 (sic). All those in favor vote aye, opposed vote nay. We're voting on an amendment by Senator Chambers to the resolution concerning the tragedy in the space flight. All those who wish to record your vote, please do so. Have you all voted? It is understood that unless there is objection, that all members names will be on this resolution as introducers. Have you all voted? Have you all voted? Record the vote, Mr. Clerk.

CLERK: 33 ayes, 0 nays, Mr. President on adoption of Senator Chambers' amendment.

PRESIDENT: The amendment is adopted.

CLERK: I have nothing further on the resolution, Mr. President.

PRESIDENT: We now have the Chambers...or the resolution offered by Senator Beutler and all others, amended. Is
